1 Brief description

1. H is the height of the fundamental screw triangle.
2. P is the pitch, the length of the fundamental screw triangle
3. D is the diameter of the screw at various points

2 Naming the screw

2.1 Imperial

Diameter — Thread per inch — Length — Type of screw

e.g. $\frac{1}{4}$ "-20 $\frac{5}{8}$ " cap screw

2.2 Metric

Diameter — Pitch — Length — Type of screw

e.g. M4-0.7 10mm set screw

3 Imperial Screw Unified Thread Standard

	Major Pitch Diameter D (inch / mm)	Threads per inch	Pitch P (inch / mm)	Preferred cutting tap drill
#0	0.0600 / 1.5240	None	None	None
#1				
#2				

4 Metric Screw Unified Thread Standard

Major diameter D /mm	Pitch P /mm	Major Diameter D /mm	Pitch P /mm
1	0.25	12	1.75
1.2	0.25	16	2
1.6	0.35	20	2,5
2	0.4	24	3
2.5	0.45	30	3.5
3	0.5	36	4
4	0.7	42	4.5
5	0.8	48	5
6	1	56	5.5
8	1.25	64	6
10	1.5
